

# The Quilted Diamond Braid

Created and Presented by Mums Inc at their Bling Retreat for 2023

a Bubblegum/Diamond Braid

Make

Cut a Single 3 foot piece of complimentary ribbon  
And insert through the black loop and staple.

Keeping ribbon flat, insert the other end into  
the white loop beside the black loop.

Pull ribbon most of the way through. Having a  
curl like this is just fine.

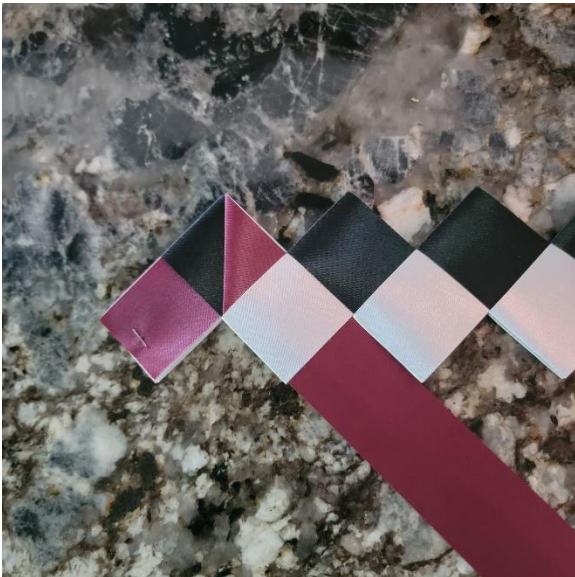

Pull curled loop to the opposite side. This will cause it to straighten out.

Fold the top ribbon against the black loop and press a crease at the edge with your finger.

Pull ribbon the rest of the way through the White ribbon. This makes your first Quilted Diamond

Next, still making sure ribbon is flat, take the end and insert it into the black loop next to the white.

Pull through partially...remember this curl is correct

Pull curl to other side, like this.

Take the bottom ribbon, pull across the white and black  
Press with your finger, against the edge.

Then pull ribbon through, giving you the second  
Quilted Diamond.

When you pull your ribbon through and you see the Quilted Diamond...do not pull through too hard, or your Diamond get's wonky! I do press it a little with my fingers, and I make the quilted diamond go down, I like it better hanging that way. ALSO, try using a #5 to make your quilted Diamond for another look!...layering also makes it unique as well! HAVE FUN!
